Maternal MAT Directory

How to Use the Digital B – UFC Specialty Provider Directory

The following directory is being made available for providers to support in identifying specialty services and programs that are open to receiving external referrals. The directory contains a list of AHCCCS covered services that can be utilized by Banner – University Family Care (B – UFC) ACC members.

The directory includes contacts, AHCCCS covered services, program descriptions and referral in details to support our member’s General Mental Health and Substance Use (GMH/SU) covered services. Which include: Crisis Stabilization, Service Plan Development, Initial and Ongoing Crisis Planning, and support for unique populations.

Click-able Directory Feature

AHCCCS covered services are available by commonly utilized services types. Each service type has a breakdown of counties that serve B – UFC/B – UCA members. Providers that offer the identified AHCCCS covered service have an imbedded link. Clicking on the provider agency will take you to the program descriptor and referral contact. This is also available for each provider listed in the table of contents.

Agencies listed in this directory are contracted with B – UFC, this may not reflect all Behavioral health Providers, for additional General Mental Health/ Substance Use providers, please refer to <https://www.BannerUFC.com/ACC> provider look-up.

For more information on fidelity to ART practice, refer to the AHCCCS Adult Recovery Team or (Adult Clinical Team: <https://www.azahcccs.gov>

General Information

Medicated-Assisted Treatment (MAT)

Medication-assisted treatment (MAT), including opioid treatment programs (OTPs), combines behavioral therapy and medications to treat substance use disorders.

The Substance Use Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities (SUPPORT) Act affords practitioners greater flexibility in the provision of medication-assisted treatment (MAT).

Opioids Treatment Program

An OTP is any treatment program certified by the Substance Abuse and Mental Health Services Administration (SAMHSA) to provide medication-assisted treatment for individuals who are diagnosed with opioid use disorder. These treatment programs are authorized to administer and distribute all forms of medication assisted treatment, Methadone, Buprenorphine (Suboxone/Subutex) and Naltrexone. Additional services within the OTP can include case management, peer support, individual counseling, group counseling and other types of support services for the individual. AHCCCS is implementing new standards and reporting requirements for all Opioid Treatment Programs (OTPs) receiving Medicaid reimbursement.

Office Based Opioid Treatment Programs

OBOT programs allow for qualified primary care physicians to provide opioid treatment services in their office-based settings. Federal guidelines allow qualified physicians in the OBOT to prescribe medications for opioid use disorder in their office setting, but it is required that the physician has the ability to connect their patients to the appropriate level of counseling and other appropriate support services

Service Standards/Provider Qualifications

Individuals providing peer services must be employed by or contracted with a Community Service Agency or a licensed facility allowed to bill the procedure code. Community Service Agencies providing this service must be Title XIX certified by AHCCCS.

Self-help/peer services are provided by those who have been credentialed as Peer/Recovery Support Specialists through an AHCCCS BEHAVIORAL HEALTH SERVICES approved Peer Support Employment Training Program, self-identify as a "peer" and are qualified as behavioral health professionals, behavioral health technicians, or behavioral health para-professionals as defined in 9 A.A.C. 10. A "peer", as referenced in these provider qualifications, is defined as an individual who is, or has been a recipient of behavioral health services or substance abuse and has an experience of recovery to share.

Crisis Support

A Crisis is when a person presents with a sudden, unanticipated, or potentially dangerous behavioral health condition, episode, or behavior. Crisis intervention services are provided to a person for the purpose of stabilizing or preventing a sudden, unanticipated, or potentially dangerous behavioral health condition, episode, or behavior. Crisis intervention services are provided in a variety of settings or over the telephone. These intensive and time limited services may include screening, (i.e. triage and arranging for the provision of additional crisis services) counseling to stabilize the situation, medication stabilization and monitoring, observation and/or follow-up to ensure stabilization, and/or other therapeutic and supportive services to prevent, reduce or eliminate a crisis situation.

Crisis Response Network (CRN) Crisis Line:
(602) 222-9444 or (800) 631-1314

(Gila County, Maricopa County, Pinal County)

NurseWise Crisis Line:
(520) 622-6000 or (866) 495-6735

(Cochise County, Graham County, Greenlee County, La Paz County, Pima County, Santa Cruz County, Yuma County)

AHCCCS COVERED SERVICES

Medication Assisted Treatment (MAT) for Substance Abuse Disorders (suds)

Medication-Assisted Treatment (MAT) is the use of medications, in combination with counseling and behavioral therapies, to provide a “whole-patient” approach to the treatment of substance use disorders and prevent opioid overdose. A combination of medication and therapy can successfully treat these disorders, and for some people struggling with addiction, MAT can help sustain recovery.

CODAC Health Recovery Wellness

<http://www.codac.org/>

CODAC Health, Recovery & Wellness provides treatment and support services to the families of babies exposed to drugs during pregnancy. This includes pregnant/postpartum women, spouses/partners, and their families. The treatment is convenient, compassionate, and effective offered at Tucson Medical Center (TMC). The treatment team can help connect and coordinate care with primary care, OB/GYN, psychiatry and other health care providers, as necessary.

Services:

- Therapy and support groups alongside women with similar experiences.
- Individual, couples, and family therapy are provided by therapists who are knowledgeable about women’s concerns, health, and well-being.
- Skills Workshop
- Case management
- Residential Treatment Facility for pregnant and postpartum women with Substance Use Disorder.
- On-site pharmacy and lab
- Additional support for postpartum depression and other mood disorders related to pregnancy and childbirth.

Parenting Skills:

We provide tools and opportunities for parents to practice new skills such as:

- How to nurture and soothe a baby
- Responding to distress cues
- Over-stimulation support
- Implementing a routine and schedule
- Self-care

Alpha Team:

The Alpha Team program follows criminal cases involving CODAC members from the point of incarceration to final adjudication. The team supports CODAC staff and members by meeting members at the jail, attending court hearings as well as jail and/or probation staffing.

MAT Medications:

- Methadone
- Suboxone
- Vivitrol

Community Bridges Inc.

<https://communitybridgesaz.org/>

CBI offers psychiatric services for people with general mental health needs in an outpatient environment. Using what we call a Patient-Centered Medical Care model, we promote an open partnership between practitioners, patients, and their families. We treat an individual's mental health using an integrated approach because we know mental well-being goes hand in hand with physical well-being and recovery. A variety of treatments are used, including psychotherapy, medication, and psycho-social interventions to build a unique treatment plan for each individual.

CBI coordinates patient care and treatment plans with other specialists to ensure a patient's needs are met, through support from peers with shared experiences, patients find a new purpose through our one-on-one case management in a setting that models the importance of healthy support systems.

Medication Assisted Treatment (MAT):

CBI uses best practices to help adults with opioid dependency of prescription pain medications, fentanyl, and heroin. Our Medication Assisted Treatment (MAT) program is a "whole patient approach" to substance use disorder, as described by the National Institute on Drug Abuse. Treatments include a multi-disciplinary approach with medication, counseling, and behavioral therapies. MAT protocols are directed by licensed medical practitioners and supported by a clinical team of registered nurses, behavioral health specialists, peer support specialists, and transition coordinators. We monitor patients' mental and physical health, while integrating therapy and peer services.

Opioid Treatment (MAT)

- Evaluation and Medical Consultation
- Medical Detoxification
- Outpatient Treatment Groups
- Primary Medical Care
- Psychiatric Evaluation and Treatment
- Peer Support
- Continuum of Care
- Relapse Prevention
- Individual Counseling
- Family Education

MAT Medications varied by clinic:

- Suboxone
- Vivitrol
- Methadone

Community Medical Services (CMS)

<https://communitymedicalservices.org/>

Community Medical Services (CMS) provides ASAM Level 1 Outpatient Opioid Maintenance Treatment services for all members including pregnant women with a diagnosis of opioid use disorder (OUD). Members participate in case management, medication management, group, and individual counseling where members can work on relationship healing and restoration, and increase and enhance self-awareness, self-sufficiency, and self-responsibility. CMS works closely with DCS and do a lot of education to our moms about DCS involvement. Members receive counseling weekly for the first 90 days and no less than 1x per month after 90 days.

The purpose of the program is to:

- Increase understanding and insight about the disease of addiction by providing continuous education about all physical, mental, emotional, psychological, financial, legal, social, and relational aspects of chemical dependency and the subsequent recovery process.
- Teach appropriate life skills that assist in the progressive development of physical, mental, emotional, and social. And encouraging healthy coping strategies and interventions by learning the negative effects of illicit and illegal drugs.

MAT Medications:

- Methadone
- Suboxone
- Vivitrol
- Sublocade

Intensive Treatment Systems

<http://www.itsofaz.com>

Intensive Treatment Systems (ITS) is a, outpatient substance use treatment program providing Medication Assisted Treatment (MAT) to patients who are affected by Opioid Use Disorder and/or Alcohol Use Disorder. The primary treatment objective of ITS is to help patients free themselves from the dysfunctional pattern of drug and alcohol use.

Our aim is to guide members toward a drug and alcohol-free lifestyle with improved personal and vocational functioning. Medication services are provided 24 hours a day 7 days a week and closely monitored by qualified medical staff, who emphasize safety and a comprehensive approach to the patient’s treatment. Counseling and case management services are provided by addictions professionals who utilize Motivational Interviewing and other evidenced based practices to ensure exceptional recovery-oriented and patient centered treatment.

Services:

- Counseling
- Peer Support
- Case Management

MAT Medications:

- Methadone
- Suboxone
- Vivitrol

Mariposa Community Health Center (MCHC)

<http://www.mariposachc.net/>

One of our goals at Mariposa Community Health Center is to improve quality of life and reduce harm to patients with Opioid Use Disorder (OUD) utilizing Medication-Assisted Treatment with compassion and empathy. The medication we have chosen to prescribe is Buprenorphine and Naloxone. MAT Services are also offered to pregnant women by our trained OB-GYN. Mariposa’s Pharmacy will dispense the medication to the patient to begin induction at the Center. The patient will continue treatment at home after clinical improvement is observed and the induction process is completed. A follow up appointment is required in 24 hours to monitor the patient’s progress.

MAT Medications:

- Buprenorphine

Valle del Sol

<http://www.valledelsol.com/>

Valle del Sol offers an integrated approach to healthcare. Primary healthcare services are offered for children and adults in addition to behavioral health services. Combining primary care and mental health services allows for an integrated health care team to treat the whole person: mind, body, and spirit.

Court-Ordered Treatment:

Programming for individuals who are court -ordered or non-court ordered to complete the following treatment:

- Anger Management
- Parenting
- Domestic Violence
- Substance Abuse
- DUI

Outpatient Opioid Treatment Program:

If you have an opiate addiction of at least 12 months and are at least 18 years old, Valle del Sol can help through a comprehensive Outpatient Opioid Treatment Program, Medication-assisted treatment program (MAT).

Services:

- Individual Counseling
- Group Counseling
- Primary Care
- Medication Management
- Family Counseling
- Evaluations

MAT Medications:

- Methadone
- Suboxone
